PROFESSIONAL SUMMARY

Solutions-oriented Healthcare IT professional with deep experience translating complex clinical requirements into functional, integrated systems. Epic-certified LIS specialist and HL7/FHIR integration engineer with a proven track record of diagnosing system-level problems, driving implementations end-to-end, and communicating technical solutions clearly to both clinical and executive stakeholders. Rare combination of hands-on laboratory expertise — histotechnology and anatomic pathology — and modern software fluency (Python, SQL, JavaScript) that enables rapid root-cause analysis and credible technical consultation. Comfortable navigating ambiguous, high-stakes environments and building trust across IT, clinical, and vendor teams.

CORE COMPETENCIES

Clinical Systems Integration · HL7 Interface Engineering · FHIR (Foundational) · Epic Beaker AP · Epic Cogito · Soft SCC LIS · SQL & Python · HTML / CSS / JavaScript · LIS-EMR Workflow Design · Technical Stakeholder Communication · Implementation & Go-Live Support · Root Cause Analysis · Vendor Management · LOINC / SNOMED · HIPAA Compliance

EXPERIENCE

LIS Applications Analyst | National Jewish Health

Denver, CO · Dec 2024 – Present

- Serve as primary solutions contact for a Soft Computer LIS integrated within a live Epic enterprise — diagnosing workflow failures, configuring clinical logic, and delivering targeted fixes across anatomic pathology and laboratory operations.
- Design and manage HL7 interfaces governing orders, results, and specimen workflows between LIS and Epic — ensuring data fidelity, LOINC/SNOMED compliance, and downstream billing accuracy.
- Develop SQL-based operational reports and custom queries for laboratory leadership, iterating rapidly on deliverables based on direct stakeholder feedback.
- Act as technical liaison across laboratory, IT, Epic, and vendor teams — translating clinical requirements into system configurations and communicating constraints back to non-technical decision makers.
- Led a major LIS version upgrade spanning a ~5-year patch gap; independently diagnosed and resolved a critical SFTP file transfer failure affecting instrument communication during production cutover — restoring system stability under time pressure with minimal operational disruption.

Lead UX/UI Designer & Systems Analyst | Greenfield Capital Recovery

Denver, CO · Jan 2023 – Aug 2023

- Drove end-to-end business systems redesign using Webflow and modern frontend tooling — translating complex operational requirements into production-ready interfaces and technical workflows.
- Bridged non-technical stakeholders and implementation teams, producing clear documentation and rapid design iterations based on direct user testing feedback.
- Applied HTML/CSS/JavaScript fluency to deliver custom interface components aligned with business logic — experience directly applicable to customer-facing solutions engineering.

Histotechnologist | Denver Health

Denver, CO · Jun 2023 – Dec 2024

- Provided SME input during laboratory system optimizations and reporting initiatives, collaborating with IT and informatics teams to surface and solve workflow inefficiencies.
- Full-spectrum anatomic pathology experience — accessioning through final diagnosis — enabling rapid, grounded understanding of the clinical pain points technology must solve.

Charge Histotechnologist | Centura Health

Lakewood, CO · Oct 2018 – Nov 2022

- Served as primary departmental liaison during a digital pathology implementation — coordinating vendor, IT, and pathology leadership through requirements gathering, deployment, and post-go-live optimization.
- Led laboratory operations and cross-functional workflow coordination, driving measurable improvements in specimen turnaround time and system utilization.

CERTIFICATIONS & LICENSURE

- Epic Beaker Anatomic Pathology Analyst
- Epic Cogito Fundamentals
- Digital Pathology Implementation — NSH (National Society for Histotechnology)
- HTL (ASCP) — Histotechnologist

EDUCATION

UX/UI Design · University of Denver	2022
B.S. Biological Science · Metropolitan State University of Denver	2018
